2nd Street #14
Guyanabo, PR 00968

Dear Gentlemen,

MCC and MNC

The Information and Communications Technology Authority (the Authority) is in receipt of correspondence from all three parties addressing the merits of requiring Licensees to utilize a Mobile Carrier Code (MCC) and a Mobile Network Code (MNC) specific to the Cayman Islands. The position of the parties, as reflected in their correspondence, was submitted to the Board of the Authority for consideration and issuance of a decision.

The Board also took into account statements on the subject by both Telcordia and the International Telecommunication Union, the ability of Licensees to offer full roaming coverage and a full range of services immediately following the Maturation Date for mobile services, and assurances from the companies as to their ability to provide complete revenue capture.

The Board has decided that mobile Licensees may utilize the MCC and MNC codes which permit the most efficient deployment of their services to consumers in the Cayman Islands. In doing so, the Board reserves the right to require mobile Licensees to forthwith utilize the Cayman Islands MCC in the event mobile revenues attributable to the Cayman Islands are not properly reported. Additionally, the Board reserves the right, following public consultation and a reasonable time for implementation, to require utilization of the Cayman Islands MCC in the event that such is viewed as appropriate to accord with revised international standards and guidelines.

Yours sincerely,

"Signed"

Philip Brazeau
Head of Licensing & Compliance
General Counsel
