Frans

Thanks for checking with us on these.

Jasper has had a look and those indeed were incorrect references.

Interrogatory 33: The reference should be to first round interrogatory no. 96.

Interrogatory 34. The reference should be to E136 and E133 in the 'Demand Calculations' sheet not the 'Demand Assumptions' sheet. The interrogatory should have been: "Cell E136 of the 'Demand Calculations' sheet shows the demand in number of minutes for the MSC. However, the driver for the MSC as indicated in cell E133 is number of calls. Provide a detailed explanation of this apparent mismatch or make the appropriate corrections to the module."

Interrogatory 40: The references should have been to G138, G143, G148 for the 3G model (the G105, G110 and G115 are in the 2G module).

Sorry for any confusion and if there are any other questions, please feel free to check with us.

Thanks

....mark

Subject: FLLRIC Interrogs

Mark,

A few quick questions:

Re Int 33, it looks to me like it should reference first round Int 96, not 94. Could you verify?

Re Int 34, I could not find cells E135 or E133 in the Demand Assumptions sheet of the 3G model that was updated on 10_03_11. Am I looking at the right document?

Re Int 40, same question re cells G105, G110 and G115 in the Network Costs sheet of the 3G model. Am I looking at the right thing?

Thanks

Frans
