**Subject:** Local Programming

Free local news and programming are vital to Cayman (or to any country).

The government of Cayman should be extremely grateful to Cayman 27 for providing this service and should enforce the requirement to provide this service any other cable company.

Cayman 27 does a great job of local coverage from the news, weather and sports to all current events. It would be a shame to see this service to the community in jeopardy.

I look forward to the news every night.
