**Subject:** RE: Public Consultation 700 MHz

Glen,

Telecayman response to the questions as follows:

*Question 1: Do you agree that the 700 MHz spectrum should be channelized in the Cayman Islands based on 18 channels of 6 MHz each as was done in ECTEL and if so, why? If not, what channelization method do you consider appropriate (e.g. the FCC 'method') and why?*

Telecayman agrees that the 700 MHz spectrum should be channelized in the Cayman Islands based on 18 channels of 6MHz each. There are 2 reason for this. 1) Equipment manufacturers are building equipment based on this channelization

2) It allows carriers in Cayman to request only the channels that they need and actually utilize.

*Question 2: Do you agree that the number of channels to be assigned by the Authority to each operator and how they should be assigned should be left to the discretion of the Authority after consideration of the operators' business and technical proposals?*

Telecayman agrees that the assignment should be left to the discretion of the Authority based on the operator's business and technical proposals.

*Question 3: Do you consider that it is appropriate to reserve 24 MHz of the 700 MHz for use by public safety agencies and 24 MHz for future use?*

Telecayman agrees it is appropriate to reserve 24 MHz for public safety and 24MHz for future use.

**Regards,**  
Bob
