Re: Post LNP Implementation Consortium Status

Dear Mr. Archbold,

Logic is in agreement with LIME and Telecayman's submissions that the initial mandate of the ICTA only covered the consortium status up until the go live date of LNP.

Logic definitely foresees the need for some post LNP implementation body to oversee issues that may arise periodically as our experiences with LNP progress. A quarterly meeting schedule with provisions for extraordinary meetings if needed seems prudent.

In talks with the LNP CRD provider they have mentioned in their experiences that the regulatory authority is normally involved in the post LNP process. It is of Logic's opinion that a consortium similar to the one that exist involving a representative from each carrier holding NXX's be formed and chaired by the ICTA as this will provide operating efficiencies.

Sincerely,
WestTel Ltd T/A Logic

'Signed'
