Subject: ICTA letter to the LNP Consortium dated 24 June 2011

Dear Mr. Archbold,

Telecayman acknowledges that the ICTA will not extend the Implementation Deadline beyond July 1, 2011. Telecayman is aware that the obligation is binding on the carriers individually and therefore is ready to demonstrate that we can provide the public a practical LNP service on July 1, 2011.

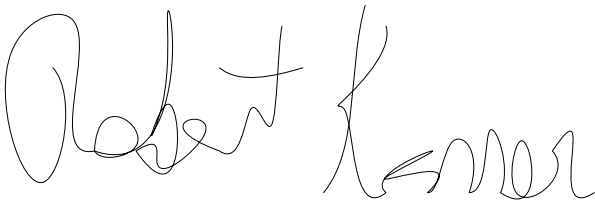

Unfortunately, the LNP service that we are ready to provide will not be feasible until the remaining Consortium members are ready to go “live” with LNP. Telecayman does not know when the remaining carriers (Logic, Lime, & Digicel) will be ready to implement but can insure the ICTA that Telecayman will not add to the delay of implementing LNP provided the following conditions apply:

- 1) All mobile calls leaving Telecayman’s voice platform will be sent to Lime over the 3rd party Trunk Group for call processing without any “carrier” prefix and Lime will route the call to Lime mobile or to Digicel mobile as required.**

- 2) All fixed line calls leaving Telecayman's voice platform will be sent to Lime over the Lime local Trunk group for call processing without any "carrier" prefix and Lime will route the call to their Subscriber.
- 3) Any other non-Telecayman calls leaving Telecayman's voice platform will be sent to Lime over the 3rd party Trunk Group for call processing without any "carrier" prefix and Lime will route the call as required.

In conclusion, Telecayman is ready to implement its LNP solution immediately but in fairness to the Public (who will benefit from LNP), Telecayman proposes that there be a test period agreed to by the carriers in the Consortium and the ICTA to insure the process works before rollout.

Sincerely,

A handwritten signature in black ink that reads "Robert Kanner". The signature is fluid and cursive.
