Information & Communications Technology Authority

3 December 2009

Michael Edenholm
Chief Executive Officer
WestTel Limited
P.O. Box 31112 SMB
1st Floor Trinity Square
Grand Cayman, Cayman Islands

Dear Mr. Edenholm,

Re: Public Consultation on Deep Packet Inspection & Similar Technologies

The Authority acknowledges receipt of WestTel's responses to the questions in the above-mentioned proceeding, dated 2 September 2009 and 25 September 2009.

The Authority notes that, as part of its submissions, WestTel has confirmed that it is currently using DPI or a similar technology on its network. The Authority is concerned that this use of DPI may not have been adequately communicated to customers. Moreover, the Authority considers that this continuing use of DPI may give WestTel a competitive advantage, as other operators are prevented from installing or implementing DPI or similar technologies under the Authority's 10 July 2009 directive. Accordingly, WestTel is hereby directed to demonstrate why it should be allowed to use DPI pending the completion of this proceeding.

WestTel is hereby directed to file its comments no later than **18 December 2009**.

Yours sincerely,

David Archbold
Managing Director
