Subject: Saving local T.V.

Every country need to have a local television.

1. It is essential for news, we need to know what is going on in the country.
2. It gives us information on fundraising events/ latest happenings in the country.
3. It is not everyone can afford to have a cable network in their homes.
4. The elderly would prefer to watch local television. Although it is unlikely for the younger ones to prefer local television, there are a few that would miss it dearly.

Therefore, without local television most for us will feel lost or not been up to date. We do not necessarily need to know what is going on in other countries but, we must know what's happening in the country and Cayman27 as far I know was doing well informing about both local and international news. I personally as ways looked forward to daybreak and evenings news and other programs. I know I will miss Cayman27 and I know my family members will also miss it.
